SUMMARY

- MERN Stack Developer with hands-on experience in building scalable web applications using React, Node.js, Express, and MongoDB. Currently advancing skills in Artificial Intelligence and Machine Learning to develop intelligent and data-driven solutions.

SKILLS

TECHNICAL SKILLS

- **Programming Language**- Java, Python, Javascript
- **Frontend Development** - JavaScript, React.js and Redux, TypeScript
- **Backend Development** - Node.js, Express.js
- **Databases** - MongoDB, SQL (basic querying and data manipulation)
- **Libraries** - Matplotlib, Panda, Numpy
- **Tools & Version Control** - Git, GitHub, VS Code, Postman, JWT
- **Core Concepts** - Data Structures & Algorithms, Object-Oriented Programming, Foundational Machine Learning

NON-TECHNICAL SKILLS

Project Management | Teamwork | Time Management, Leadership | Effective Communication | Critical Thinking

PROJECTS

NimbusNote

- Developed a full-stack note management web application enabling users to securely create, organize, and manage notes with JWT-based authentication. Implemented full CRUD functionality, tagging, and a responsive UI for an optimized user experience.
- **Tech Stack**:- React.js, Node.js, Express.js, MongoDB, JWT, bcrypt.js, Tailwind CSS / Bootstrap

Alina-AI | Python Voice Assistant Project

- Developed an intelligent voice assistant inspired by Alexa and Google Assistant, capable of executing voice commands for web automation, music playback, and news retrieval. Integrated OpenAI's GPT model for conversational responses and implemented text-to-speech functionality for interactive feedback.
- **Tech Stack**:- Python, OpenAI API (GPT-4.1-mini), pyttsx3, SpeechRecognition, NewsAPI, dotenv

Heart-Disease-Prediction

- Contributed to developing an AI-powered Heart Disease Prediction System by implementing the Flask backend, integrating OpenAI GPT API for automated report-to-feature extraction, and managing data preprocessing and model prediction workflows using Scikit-learn and Pandas.
- **Tech Stack**:- Flask, OpenAI API, Scikit-learn, Pandas, NumPy, HTML, CSS, Jinja2, Joblib, Git, GitHub

Posting

- A full-stack social media application built with the MERN stack where users can create posts, upload images, view feeds, and interact with content.
- **Tech Stack**:- React.js, Node.js, Express.js, MongoDB, Axios, Mongoose, React Router, Context API, CSS3,

TextCustomizer

- TextCustomizer is a web-based tool that helps users quickly transform and format text in different styles. It offers multiple customization options for efficient text editing and formatting.
- **TechStack**:- React.js, Javascript, Bootstrap, Html
